THE UNITED STATES GAME.

No. 1.

The Ne Plus Ultra of Games.

New, 1901.

This is the finest Board Game we have ever made. The game is very large, being nearly three feet long by a foot and one-half wide, and is exceptionally handsome.

The Board upon which the game is played is the most carefully drawn picture map of the United States which has ever been used for the purposes of a game, showing the principal cities, railroads and characteristics of the country.

The game itself is absorbingly interesting and instructive, and is far superior to our older game "Across the Continent," which we have in consequence discontinued.

It is played with our system of route tickets, and represents the tours of the different players across the continent. It is excellent fun for old and young. Size, 34 x 17½ inches.

PRICE, \$2.00.

Shadow Cuttings.

A Novelty for Children.

No. 656.

This is the most attractive drawing novelty for children which has been devised since "Drawing Teacher" was made many years ago. It consists of a number of pictures shaped in stiff card board, which when placed against paper furnishes a strong, clean outline for the pencil.

The paper furnished with the amusement is black upon one side, the idea being, after the outline of the silhouettes is drawn, by following the pattern, to cut out the design with scissors, and paste it upon a card or larger sheet of paper. This gives an attractive silhouette picture.

The designs made are "Red Riding Hood and the Wolf," "Mother Goose" and similar subjects.
Size 10 x 7 inches.

PRICE, 30 CENTS.

The War in South Africa.

No. 500.

New, 1900.

In its playing qualities, this game is one of the best ever issued. Much thought, care and time have been spent upon it in all ways.

THERE ARE TWO WAYS OF PLAYING; *one a very simple but fascinating and exciting game for little children*—one they can readily understand and greatly enjoy. The game for older persons is one of the deepest interest. While chance enters largely into the game, as in the real warfare, thoughtful playing and strategic ability can accomplish a great deal.

There is no battle game which compares with it in interest.

Handsomely labeled in many colors and gold. Its appearance and general excellence make it one of the quickest sellers of all large Board games. Played upon a bird's-eye-view covering South Africa from Durban and Kimberly to Pretoria and Barberton.

Salesmen may confidently recommend this as an especially "good game to play."

Size, 24 x 16 inches.

Railroads, carriage roads, and a beautiful river are the routes by which they may go to the city. Points are also given for "Bravery," "Hot Work," "Good Judgement," etc., while "Timidity" and "Cowardice" take points from a player's score.

FAMOUS BOARD GAMES OF SKILL.

(Folding Board 50c. Edition.) No. 19.

Chivalry.

New Editions of this Popular Game.

Chivalry is conceded to be the most noteworthy modern invention in games. It is full of life and spirit. It affords a field for brilliant or thoughtful play that is perhaps unequalled.

Chivalry (Drawer-Board Dollar Edition.) No. 750.

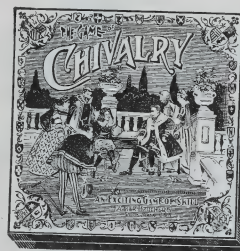

WHAT EXPERTS SAY OF CHIVALRY.

Mr. H. Pillsbury, the famous chess champion, writes:—"I consider Chivalry a remarkably interesting and amusing game of skill for young or old."

F. W. Berry, Esq., one of the most prominent Chess players of Massachusetts, writes:—"It is more easily learned than Chess, since it is not so complex. The possible combinations are entirely different from those of Chess, but are equally profound and pleasing."

Mr. H. Davidson, the well-known checker player, writes:—"I have no hesitancy in saying that I think Chivalry superior to Checkers."

In Chivalry each player has twenty pieces, his object being to force two of his men past the ranks of his opponent to the starred squares beyond. Players can "jump over opposing pieces removing them from the board," "canter over friendly pieces, without removing them," or make a "plain move," one square at a time.

Jumping Turtles.

No. 601.

This is a decided innovation in games. It is as attractive as it is novel. The game consists of a number of realistic representations of Turtles in metal. These Turtles, when struck with a stick upon their projecting heads or tails, will bound several feet into the air. The Turtles may be "nested" and all of them be made to jump at one time. The game may also be varied by setting an obstacle, such as a book, in front of them, to be jumped over, or they may be made to jump into the box. The count is made according as the Turtles land upon their legs or backs or succeed in passing obstacles.

"PILLOW-DEX" in its various editions has Produced the greatest sensation in games since "Tiddledy Winks." Its sale is greater than that of any game for years.

Any number can play. People of all ages find it laughable, exciting and absorbing. The game has been trade-marked and patented in many countries, and exported to almost every quarter of the globe.

"PILLOW-DEX" is played by any number of players, divided into two parties, who seat themselves on opposite sides of the division line which may be placed along the centre of the dining-room table or upon the carpet.

One of the "Pillow-Dex" balloons is then inflated by blowing into it through the mouthpiece.

The neck of the "Pillow-Dex" balloon is tied with string and the ball is struck into the air and the game begins.

The object is to make the "Pillow-Dex" balloon land on your opponent's side of the line as it is struck lightly and rapidly back and forth.

Don't let the balloon land on *your* side of the line; if it does, it counts a point for your opponent, and 10 points won make a game.
